

## University of Michigan, PhD in Clinical Science

### Consumer Disclosure Information

#### Educational Requirements for Licensure in Psychology

The Clinical Science PhD Program in the Department of Psychology at the University of Michigan (referred to as “our Program”) makes every effort to provide education that is compliant with national standards and to prepare students to practice clinical psychology. As recognition of our compliance with national standards, our Program is accredited by the American Psychological Association<sup>1</sup> (APA) and Psychological Clinical Science Accreditation System (PCSAS). The practice of psychology, however, is regulated at the state level. State licensing authorities, commonly referred to as “State Boards,” determine the specific educational and training requirements for licensure in their state. Of note, many states require post-doctoral training as well as examinations beyond educational and training requirements. As such, a PhD degree from our Program in Clinical Science is not sufficient, in and of itself, to meet licensure requirements in most states.

If you are planning to pursue professional licensure or certification, it is strongly recommended that you contact the appropriate licensing entity in the state for which you are seeking licensure or certification to obtain information and guidance regarding licensure or certification requirements before beginning an academic program. Given that state requirements for licensure or certification vary and may change over time it is also strongly recommended that you review licensing or certification requirements as you get closer to seeking licensure or certification. You are encouraged to review the Association of State and Provincial Psychology Boards’ online tool, PsyBook (<https://www.asppb.net/page/psybook>), which summarizes requirements for most states and territories. You are also encouraged to confirm state licensing requirements directly with the state you are interested in seeking licensure or certification.

The University of Michigan, to the best of its ability, determined that the curriculum offered by our Program meets – or does **not** meet – the educational requirements for licensure or certification to practice psychology in each of the States listed in Table 1. For states in which the Program’s educational offerings do not meet a specific state’s requirements for licensure or certification, students may be required to obtain alternate, different, or more courses, or more experiential or clinical hours required. These findings are accurate, to the best of our ability, as of July 20, 2022.

\*Note, the requirement for Consumer Information Disclosers comes from the U.S. Dept of Education, so this document only includes state-by-state requirements for licensure. The

---

<sup>1</sup> For further information about APA accreditation or specific information about the accreditation status of our PhD program, please contact Jacqueline Remonet Wall, PhD Director, Office of Program Consultation and Accreditation American Psychological Association 750 First Street, NE Washington, DC 20002-4242 202-336-5979, <http://www.apa.org/ed/accreditation>.

Canadian psychology regulatory community has agreed that a doctoral degree earned in a program accredited by the Canadian Psychological Association (or the American Psychological Association) is the standard acceptable for registrations as a Psychologist. Canadian provinces are all in the process of moving to that standard.

Table 1

In the table below, an asterisk (\*) indicates that earning a doctoral degree from a program accredited by the American Psychological Association (APA) is deemed to meet the educational requirements for licensure in that State. A (+) indicates that a PCSAS accreditation deemed to meet educational requirements. The Clinical Science PhD Program in the Department of Psychology at the University of Michigan is currently – and has been continuously – accredited by APA since 1948 (see: <http://www.apa.org/ed/accreditation>). Please note that this table does **not** include an evaluation of state-specific requirements beyond that of educational or curricular requirements.

State	Program Satisfies Curricular Requirements?			State Professional Association or License Authority and Notes
	Yes	No	Unable to Determine
