

OUTSTANDING RESEARCH MENTOR

KENDELL PAWELEC, PH.D.

POSTDOCTORAL FELLOW, MECHANICAL
ENGINEERING, COLLEGE OF ENGINEERING

Dr. Pawelec was nominated by:
Jack Lucci and Angelica Galvan

With my previous research experiences, I've always been just told what to do, but Dr. Pawelec greatly took my interests into consideration and she constantly checks up on me to make sure that I'm happy in the lab. She gives me the option to explore and try out my own ideas with our project. Dr. Pawelec is friendly and compassionate. I am not afraid to go to her for any questions because I know that she won't judge me if I don't know something. Dr. Pawelec has been the greatest positive influence who has helped with my college transition here at U of M.
