

Biochemistry Major

University of Michigan - Department of Chemistry

Biochemistry is the chemistry of life. Biochemists seek to understand the chemical principles that underpin all living organisms. Biochemistry is central to medical science as almost all diseases and drugs act to change the body’s chemistry. Advances in biochemistry directly affect the fields of biotechnology, pharmaceutical science, agriculture and environmental science, among many others. The Biochemistry major is for those interested in learning about life from a chemical perspective. Students will be well equipped for graduate studies in biochemistry, chemical biology, and many other fields of inquiry in the life sciences. The major will also provide excellent preparation for students intending to pursue professional careers in industry and medicine.

Prerequisites:

- AP credit for Physics (125/127 or 139) & (126/128 or 239) will fulfill the Physics requirement.
- AP credit for Math (120 & 121) will fulfill the Math requirement.
- AP credit for Biology (195) will fulfill the Biology 171 & 172 requirement.

Biochemistry honors:

Qualified students may elect an Honors major. This program requires a thesis that describes and analyzes independent experimental work. The Honors advisor in Biochemistry must approve the research topic and advisor. Students in this program must maintain an overall GPA of 3.4 and at least a 3.4 in their major. CHEM 398 (4 credits) and the thesis course, CHEM 498, replaces the requirement for an upper-level laboratory course outlined above.

Exclusions: *Students who elect a major in Biochemistry may not elect the following majors: Biomolecular Science, Chemistry, Interdisciplinary Chemical Sciences, Biology; General Biology; Molecular, Cellular, and Developmental Biology (formerly known as Cell and Molecular Biology, or CMB); Cellular and Molecular Biomedical Science Major (formerly known as Cellular and Molecular Biology and Biomedical Engineering, or CMB:BME); Ecology and Evolutionary Biology; Microbiology; or Neuroscience. They may also not elect a minor in Biology, or any of the Chemistry minors.*

Chemistry GPA requirement:

A student must earn a cumulative grade point average (GPA) of at least 2.0 in all courses required for the Biochemistry major including prerequisites. Transfer courses are not calculated into the GPA.

NOTES:

* Students with AP credit may waive the General Chemistry prerequisites

** Students are strongly encouraged to take CHEM 351 but could substitute this course requirement with MCDB 310 or BIOLCHEM 415.
