- "Video Series: Tracing the roots of American political thought" independent study directed by Dr. Randall Auxier. (2021)

Research Projects

Thesis Project

2023 - 2024

Master's Student

- Thesis Title: "The Nature of *L'Esprit des lois*."
- Summary: This thesis argues that the particular organization, composition, and errors of *L'Esprit des lois* made the text extremely ambiguous and useful to eighteenth century theorists and politicians, despite its intimidating length. It conformed quite well to the reading culture of the age, where its readers could read their present circumstances into the author's publication and make the text theirs, allowing *L'Esprit des lois* to be used across the ideological spectrum, cultures, and various schools of thought. Thus, what was constructed was something ambiguous where its readers continued to ask and answer what the author "really" meant, helping its popularity.
- Number of Chapters: 5.
- Estimated Length: 15, 908 words.

Penny University Library & Maps

2023 - Current

Administrator and Creator

- Researches historical writers, their publications, and contexts within the 17th and 18th centuries.
- Digitizes/audifies publications from the 17th and 18th centuries to create resources for undergraduates and the public.
- Maps out the booktrade using decentralized databases such as Internet Archive and World Cat.
- Films and edits social media videos and content for public history.
- Programs Used:

- Eleven Labs: Generating the author's unique voices.
- Mid-Journey: Generating digital art.
- ArcGIS: Creating the spatial data used in the maps.
- Mapbox: Designing the maps using the spatial data.
- Tableau: Manipulating the data sets within the maps.

Mississippi Department of Archives and History - Jackson, Mississippi
