

# Bug Field Guide Instructions

## Instructions for creating the guide

1. Print all pages of the Bug Field Guide.
2. Cut each page into quarters sheets.
3. Put the pages in order starting with the title page, “Backyard Insects” on top. Then the page “How to Use this Book” next.
4. Then put the pages 1-23 after that.
5. Then put the field notes last.
6. Staple the pages together.
7. Take your field guide outside to try and identify any bugs you find!

## Insect Collecting Etiquette

- Be gentle to the animals because they are an important part of their outdoor habitat.
- Only touch animals that you know are safe.
- Hold animals in a flat hand—avoid pinching.
- Return animals back to their home in nature.
- Share what you’ve discovered through photos, drawing, and stories instead of taking things home.
