---

**EDUCATION AND PROFESSIONAL EXPERIENCE:**

-Ph.D. Ecology. 2006. Duke University  
-M.S. Range Sciences. 1998. Utah State University  
-B.S. Biology (Botany). 1993. Universidad Complutense de Madrid. Licenciatura de Grado.  
1994.

- 2014-present Associate Professor, School of Natural Resources and Environment and  
Department of Ecology and Evolutionary Biology University of Michigan.
- 2008-2014 Assistant Professor, School of Natural Resources and Environment and  
Department of Ecology and Evolutionary Biology University of Michigan.
- 2006-2007 Postdoctoral research scientist, University of Connecticut.
- 1999-2000 Research associate, Duke University.
- 1998-1999 Research technician, San Diego State University.

**PUBLICATIONS-JOURNALS:**

**Ibáñez I.**, Zak, D.R., Burton, A.J. and Pregitzer, K.S. 2018. Anthropogenic nitrogen deposition ameliorates the decline in tree growth caused by a drier climate. *Ecology* doi: 10.1002/ecy.2095

McClung, T. and **Ibáñez, I.** 2013. Quantifying the synergistic effects of impervious surface and drought on radial tree growth. *Urban Ecosystems* doi:10.1007/s11252-017-0699-5

**CURRENT GRANTS (PI OR CO-PI):**

July 2013 – June 2018. PI “The emergence of novel regeneration niches: forecasting tree species recruitment dynamics in a time of change.” NSF-CAREER \$749,994.

October 2016 – September 2018. PI “Establishing a Network of Forest Inventory Plots across U. Michigan Properties to Assess and Inform About Forest Performance Under Global Change ” USDA McIntire-Stennis \$139,022.

January 2018-August 2018. PI " Providing solutions to address the risk and impact of biological invasion under climate change" Graham Sustainability Institute \$10,000.

**PAST GRANTS (PI OR CO-PI):**

June 2014 – September 2016. PI “Assessing forest species resilience to drought: implications for forest conservation and management.” USDA McIntire-Stennis \$67,151.

April 2012 – September 2014. PI “Forests and forest pests: the next big challenge in forest conservation and management.” USDA McIntire-Stennis \$60,903.

January 2012- PI “Showcasing SNRE research at Saginaw Forest: A proposal to enhance local formal and informal environmental science education opportunities to strengthen the "Broader Impacts" of SNRE research.” SNRE seed Award amount: \$20,668. CoPI-Michaela Zint.

January 2011 – PI “Assessing the effectiveness of incentive programs to preserve forest health: biodiversity and forest regeneration surveys.” Elizabeth Crosby Program-UM. Award amount: \$ 12,845.

August 2010 – PI “Evaluating the impact of land use on the adaptation potential of tree species to global warming.” McIntire-Stennis USDA. Award amount: \$62,229.

May 2010 – PI “Phenological responses to climate change in Japan.” UM Center for Japanese Studies. Award amount: \$3,500.

August 2009 – PI “The Role of Plant-Soil Feedbacks on Species Potential to Expand their Distributional Ranges in Response to Climate Change.” NSF-EAGER. Award amount: \$247,752.

March 2009 – CoPI “Spatiotemporal models of phenology: Integrating the effects of climate change in plants and animals.” NSF. PI: Richard Primack. Total award amount \$700,000, award amount to Ibáñez at UM: \$179,837.

September 2009 - PI “The impact of land use on the adaptation potential of tree species to global warming.” McIntire-Stennis USDA. Award amount: \$25,321.

October 2008 - PI “Plant-soil feedback effects on colonization potential of migrant tree species tracking global warming.” McIntire-Stennins USDA. Award amount: \$59,684.

October 2008 - PI “Evaluating the Colonization of Great Lakes Trees Species Under Climate Change.” Seed Grant University of Michigan. SNRE seed. Award amount: \$10,020.

January 2008 - CoPI “A multi-scale approach to the forecast of potential distributions of invasive plant species.” USDA. PI: John Silander. Total award amount: \$545,000, award amount to Ibáñez at UM: \$15,000.

### **TEACHING EXPERIENCE AND TRAINING:**

Instructor: UMich – NRE 549- *Analysis and Modeling of Ecological Data*, a graduate level course. This course will consist on an overview of standard and innovative techniques in ecological data analysis and modeling. Topics will include: linear regression, mixed effects models (fixed and random effects), maximum likelihood, general linear models and general additive models, survival analysis, time series, spatial analysis and Bayesian and hierarchical Bayesian approaches. The course will be a combination of lectures and computer labs, for which we will be using two open source programs. This course is designed for students to work on their own data, or simulated data, related to their research projects or scientific interests. While reviewing the major statistical techniques, students will work on their projects and will be presenting their work to the class along the semester, these presentations will consist on: initial exploratory data analysis, selection of statistical analysis or modeling approach, implementation, and results.

Instructor: UMich – NRE 547- *Forest Ecology in a Changing World*, a graduate level course. In this course we cover from the basic concepts in ecology that apply to forests to the challenges that forests face due to global change (climate change, landscape fragmentation, pollution, introduced species). We study the ecological mechanisms behind individuals, populations, communities and whole ecosystems together with the dynamic processes associated to forests (succession, disturbances). We also review the role and impact of

humans on these communities. Field and computer labs are implemented during the semester, during those sessions students learn to formulate research questions, design data collection protocols, use field equipment and analyze the data.

Instructor: UMich – NRE 436- *Woody Plants*, a graduate and upper level undergraduate course. This is an intensive field- and lecture-based learning experience, in which students learn to identify trees, shrub and vine species that are important in Michigan environments. They learn about their taxonomy, distribution, habitat associations, and biogeographic history and how to identify them in their leafless winter condition. The lab component (see web page on field sites) consists of weekly field trips in the Ann Arbor area, which include riparian and floodplain habitats, glacial lakes, moraines, bogs, fens and mesic forests. The lectures cover elementary aspects of plant identification, taxonomy and ecology; however, the broader themes include biogeographic history and the assembly of Michigan plant communities, both before and after major glaciations, ecological specialization, and impacts of global warming and other anthropogenic environmental changes.

Outreach Co-PI and Ecology consultant: *Down to the Core*, a two-week lesson plan for 7<sup>th</sup> grade students, students learn about plant growth and the use of mathematical models to predict plant growth responses to varying environmental conditions. Based on the PI's research.

Co-instructor: UConn-EEB 482 - *Hierarchical Bayes*, an introduction developing Hierarchical Bayesian models with ecological and bio-geographical data.

Workshop Co-organizer: Ogle, K., Ibáñez, I., and Hille Ris Lambers, J. *A brief introduction to hierarchical Bayesian modeling in ecology* Ecological Society of America, Annual Meeting August 6<sup>th</sup>, 2006, August 5<sup>th</sup>, 2007, August 3<sup>th</sup>, 2008, August 1<sup>st</sup>, 2010, August 7<sup>th</sup>, 2011, August 5<sup>th</sup>, 2012 and AEET meeting October 18, 2009.

Invited Lecturer: Teachers Institute – Global Change. Michigan Technological University. July 2009.

**ADVISEES** (\*Degree/project completed):

Postdoctoral researchers: Jeff Diez\*, Sarah Neumann\*

PhD students: Dan Katz (exp. 2015), Ben Lee (exp. 2019)

MS thesis students: Zack Brym\*, Ben Connor Barrie\*, Liana May\*, Samantha Wolf\*, Drew Peltier\*, Elan Margulies\*, Natalie Tonn\*, Teegan McClung\*, Chris Karounos, Edith Juno, Caleb McCollum

Undergraduate Honor Thesis: Bhavya Sridhar\*

**AFFILIATIONS:**

- Ecological Society of America, ESA, SEEDS program
- Society for the Advancement of Chicanos and Native Americans in Science, SACNAS. Mentor.
- MentorNet, the E-mentoring network for diversity in Engineering and science. Mentor.
- UROP, Undergraduate Research Opportunity Program at the University of Michigan. Mentor.

**FELLOWSHIPS AND AWARDS:**

- Biology grant-in-aid, Department of Biology, Duke University, three times, 2002-04.
- Fulbright Fellowship to pursue a M.A. degree in Utah State University, Logan, Rangeland Resources Department, September 1995 to February 1998.
- University of Helsinki Fellowship, Department of Botany, February 1994 to June 1994. Research with Professor T. Ahti in "Ecology, Physiology, and Taxonomy of Lichens."
- ERASMUS Fellowship to attend the University of Wales, Bangor, School of Biological Sciences. October 1993 to February 1994. Project "Lichens and Pollution."

**PROFESSIONAL ACTIVITIES:**

- National Academies of Sciences, Engineering and Medicine. Committee member in report "The Potential for Biotechnology to Address Forest Health" 2017-2018.
- Since January 2017 handling editor for Diversity and Distributions.
- January 2012-December 2017 handling editor for Oecologia.
- NSF grant proposal reviewer 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015.
- NSF panelist 2010, 2014, 2015, 2016.
- NICRR grant proposal reviewer and panelist 2009.
- DOD grant proposal reviewer 2011, 2013, 2015, 2017.
- US-Israel Binational Science -Foundation proposal reviewer 2017, 2018.
- Spain- Agencia Estatal de Investigación reviewer and panelist 2017.
- AAUW reviewer and panelist 2018.
- AXA grant proposal reviewer 2009, 2010, 2011, 2012, 2013.
- Government of the Netherlands grant proposal reviewer 2009.
- Government of Chile grant proposal reviewer 2009 (2).
- BioDiversa proposal reviewer 2013.
- Cooper Award Committee, Ecological Society of America, 2006-2008.

- .Ecology and Evolutionary Biology, Departmental Seminar. University of Connecticut. December 2006.
- .Plant Ecology Seminar. University of Connecticut. October 2006.
- .University Program in Ecology Seminar Series, Duke University. April 2006.
- .Population Biology Group, Duke University. March 2005.
- .Department of Botany Seminar Series, Duke University. October 1999.
- .Department of Range Land Resources Seminar Series, Utah State University. January 1998.

### **CONFERENCE PRESENTATIONS**

- “Forecasting the impact of phenological shifts on ectotherm species” Organized oral session, ESA 2017, Potland, OR.
- “Accounting for ontogenetic and population variability among tree seedlings to predict recruitment dynamics in novel environments” Organized oral session, ESA 2016, Fort Lauderdale, FL.
- “Chronic nitrogen deposition alters tree allometric relationships and growth resilience to drought: Implications for biomass production and carbon storage under global change” Organized oral session, ESA 2015, Baltimore, MD.
- “Integrating data sources to assess biological invasions: from individual performance to species distributions.” IALE 2013, Austin, TX.
- “Using effect size to assess non-native and native species sensitivity to future conditions.” Organized oral session, ESA 2012, Portland, OR.
- “Life on the frontier: assessing tree species competitive interactions at their migratory front.” Organized oral session, ESA 2011, Austin, TX.

“Beyond their ranges, outside their niches: Assessing the adaptation and migratory potential of temperate forests to global warming.” Symposium presentation (organizer). ESA 2010, Pittsburg, PA.

“Forecasting Phenology Under Global Warming.” International Phenology and Climate Change Workshop, June 6, 2010. Jeju Island, South Korea.

“Plant-soil feedback effects on the colonization of tree species tracking climate change.” Oral presentation. IALE 2010, Athens, GA.

“Forecasting species phenological responses to global warming”. Oral presentation. IALE 2009, Snowbird, UT.

“Invasive species: Identifying hotspots and focuses of further spread.” Oral presentation. ESA, 2008, Milwaukee, WI.

“Identifying focal points of invasive species spread.” Oral presentation. US-IALE, 2008, Madison, WI.

“Spatio-temporal mismatches in species responses to climate change.” Poster presentation. NSF Workshop on Data-Model Assimilation, October 2007, Norman, OK.

“Challenges of modeling invasive species spread.” Oral presentation. Ecological Society of America, 2007. San Jose, CA.

“Modeling patterns of future plant invasions in the New England region.” Oral presentation. Colonization versus Invasion. Ascona, Switzerland. February 2007.

“Predicting tree seedling recruitment of resident and potential immigrant species under climate change.” Oral presentation. Ecological Society of America, 2005. Montreal, Canada.

“Interannual variability and tree species recruitment. Implications under global change.” Poster presentation. Winemiller Symposium, 2004. Columbia, MO.

“Regional and temporal variability on habitat suitability for seedling establishment.” Poster presentation. Ecological Society of America, 2004. Portland, OR.

“Role of climatic variability on tree species recruitment.” Poster presentation. Ecological Society of America, 2003. Savannah, GA.

“Role of environmental gradients on tree species recruitment. Comparisons within and between sites.” Poster presentation. Ecological Society of America, 2002. Tucson, AZ.

“The role of seed fall patterns vs environmental resources in the spatial distribution of tree seedlings.” Poster presentation. Ecological Society of America, 2001. Madison, WI.

“Effects of seed rain and fecundity variability on the successional dynamics of neighboring communities.” Poster presentation. Ecological Society of America, 2000. Snowbird, UT.

“Long-term photosynthetic response of Southern California Chaparral to elevated CO<sub>2</sub>.” Poster presentation. Ecological Society of America, 1999. Spokane, WA.

“Successional History of a Curleaf Mountain Mahogany Stand: a Hypothesis.” Poster presentation. Shrublands Ecotones, 1998. Ephraim, UT.

“Environmental conditions affecting emergence and seedling establishment of the tree *Cercocarpus ledifolius* during the first growing season.” Ecological Society of America, 1998. Baltimore, MD.

“Contribución al conocimiento de la flora liquénica epífita de Barco de Ávila (Ávila, España).” Poster presentation. X Simposio Nacional de Botánica Criptogámica, 1994. Tenerife, Spain.

#### **WORKSHOP PARTICIPANT/ORGANIZER**

RNC Forecasting, “Coupling demography and physiology to forecast species responses to novel conditions” January 2015. Organizer.

NCEAS, “Climate change and invasive species,” January 2011 February 2012, Participant.

NIACS, “Vulnerability Assessment of Great Lakes forests”, September 2012. Consultant.

Cary Institute for Ecosystems Studies “Climate Change and Species Interactions”, November 2012. Panel facilitator.

Duke University “Macrosystems Forest Group”, May 2013. Consultant.
